Foreword

Many of the crosses offered in this catalogue are too well and favorably known to require further comment. With reference to some of the newer crosses, may we state that each has been made only from the very best stud stock and only after searching and careful study by competent and experienced hybridists aiming for the highest possible results.

The present collection of "Stewart's Orchids" stems from an amateur interest dating back over the years. Originally most of our purchases were from ranges favorably known internationally, and plants were selected from those in flower and premiums paid. However, in years past, we too, have at times strayed from the straight and narrow path and grown seedlings from breeders of less experience and perhaps less conscience and integrity. We too, have tasted the bitter disappointment of years wasted in culture and anticipation. A seedling that produces a poor bloom is expensive at any price. But when a seedling produces an extraordinary flower, the original purchase price is of no importance.

You can select from this catalogue with utmost confidence. Experience, the very cream of stud stock, and sincerity of purpose to produce only the finest possible seedlings, controls our operation.

ORCHIDS and ANTHURIUMS

114 South Burton Avenue

San Gabriel, California

List No. 14

In making a list such as this we can show only the smallest fraction of our stock. Those who visit the nursery can choose from the hundreds of varieties not listed as well as from those in the catalogue. All plants are in vigorous health and are bred from the finest parents for vigor, color, size, texture and season of bloom. We have exercised the greatest care in the selection and breeding of our plants and our purpose is always for the production of top quality stock.

Prices quoted are for well established plants, many of them ready for larger pot sizes.

Please list a second choice in the event that varieties you have selected are sold out.

At all times we invite prospective purchasers to visit our greenhouses and look over our stock of seedlings and flowering size plants.

In addition to our Cattleya list we have a separate catalogue for Cymbidiums which we shall be happy to send to anyone requesting it.

Packing is free of charge for all plants listed.

All items listed are subject to prior sale.

California purchasers add 2½% state sales tax.

Prices subject to change without notice.

Name, Parentage and Description	Size	Each
Lc. Windermere x Lc. Locarno We expect flowers from this cross to have uniformly good shape, size, texture and color. This hybrid holds much promise as both parents were superb.	3"	Community Pots. 8-12 plants per pot 10.00
C. Altadena x Lc. Cuesta A free flowering, easily grown, quality hybrid was the object in making this cross. Lc. Cuesta ranks among the finest hybrids bred to date and we are confident of its ability to breed quality.	3"	Community Pots. 15-25 plants per pot 17.50
C. Jean Barrow x C. Suzanne Hye alba This cross should be a very worthwhile winter and spring white. C. Suzanne Hye alba has been used with considerable success in the making of such fine hybrids as C. Bow Bells, C. Edithiae and many others.	3" 2"	Community Pots. 5-10 large plants, per plant 2.00 pots 4.00
C. Ville de Liege alba x C. Luegeae alba An extremely free flowering and easily grown white with purple lip is expected from this cross. The season should be summer and fall.	3" 2"	Community Pots. 15-25 plants per pot 20.00 pots 4.00
C. Varuna x Lc. Gitche Manito This is a cross that we are counting on to be most worthwhile. Both parents are large and dark. Season will be variable though primarily summer and fall.	3" 2"	Community Pots. 15-25 plants per pot 20.00 pots 4.00
C. Fabianid x C. Mt. Royal From both parents have come some very fine hybrids. The combining of these two should result in a most worthwhile cross. The season will be summer and fall. Dark flowers freely borne can be expected from most of the plants.	3" 2"	Community Pots. 15-25 plants per pot 15.00 pots 3.50
C. Maggie Raphael (C. Trianae var. Imperator x C. Dowiana) Flowers will have very good color with especially dark lips which is characteristic of C. Trianae Imperator hybrids. Season will be fall and early winter.	3" 2"	Community Pots. 5-10 plants per pot 7.50 pots 3.00
C. Gigas (Species) Bred from two of the finest forms of this species, we expect this strain of home grown Cigas to be really of great merit. The flowers will be large and freely borne while the season will be early summer.	1½" 2"	1.50 2.00
C. Dinah A.M. var. x Lc. Excelsior This should be a happy combination as C. Dinah has always been a good parent. Lc. Excelsior can be expected to add color to the cross. Season spring.	1½" 2"	2.50 4.00

Name, Parentage and Description	Size	Each
Lc. Cynthia FCC RHS x Lc. Jane Dane	2"	4.00
A white with purple lip of quality is expected. The growth is good.	2½"	5.00
	3"	10.00
C. Mem. Alice Baldwin (C. Trentino C. Edithiae)	2"	3.50
A heavy textured medium sized white to flower in the spring.	2½"	5.00
	3"	7.50
C. Enid Alba (C. Mossiae Reineckiana Young's var. x G. Gigas var. F. M. Beyrodt)	1½"	2.50
One of the best of the whites with purple lip. Season variable, primarily fall.	2"	4.00
	2½"	5.00
	3"	7.50
C. Mossiae x Lc. Helen Wilmer	2½"	5.00
It is expected that the Lc. Helen Wilmer will impart its color and shape to this cross. A spring bloomer of quality is hoped for.	3"	7.50
	3½"	10.00
	4"	12.50
C. Dupreana x C. Gullio	2½"	3.50
Should resemble C. Dupreana strongly. The season will be spring and early summer. Flowers large and of good color.	3"	5.00
C. Estelle alba x C. Concinnity	2½"	5.00
From well chosen parents this cross should give an abundance of whites throughout the winter and spring.	3"	7.50
C. Clotho (C. Enid x C. Trianae)	2½"	3.50
Dependable midwinter bloomer. A free flowerer. Growth is very good.	3"	5.00
	4"	7.50
Lc. Sabina x C. Serenity	2½"	5.00
We feel that this is a cross to count on. Flowers should be large and fine. A dependable winter bloomer.	3"	7.50
Lc. Canhamiana alba (L. Purpurata "Orchid Knoll" var. x C. Mossiae Reineckiana "Youngs var.")	2½"	3.50
A superior strain of this well known cross. Season is May and June.	3"	5.00
	3½"	7.50
	4"	12.50
Lc. Cassandra x Lc. Windermere	2½"	5.00
Both parents are superb and we feel this cross will be outstanding. Color will be dark.	3"	7.50
Lc. Sargon x Lc. Sam Houston	2½"	5.00
Color, size and substance are expected to be very good in this cross. The season will probably be fall. A cross of real merit.	3"	7.50

Name, Parentage and Description	Size	Each
Lc. Louella Parsons (Lc. Jane Dane x C. Gigas, F. M. Beyrodt)	2½"	5.00
A worthwhile white with purple lip for fall. Free flowering and a compact grower.	3"	7.50
	3½"	10.00
	4"	12.50
Lc. Arthur E. Miles (Lc. Sagana x C. Mossiae)	2½"	4.00
For those who need flowers of good quality around Easter we recommend this cross. Plants of this cross which have bloomed have had very good color.	3"	5.00
	3½"	8.50
C. Mossiae x C. Thetis	2½"	3.50
A spring blooming C. Mossiae hybrid of merit is expected.	3"	5.00
	3½"	7.50
	4"	10.00
C. Dupreana (C. Warneri x C. Gigas)	2"	3.50
This is a repeat on an already well known hybrid. The season is May and June. The growth, flower quality and production of blooms will be very good. Two of the best parents were used to make this particular batch of seedlings.	2½"	5.00
	3"	7.50
C. Ardmore x C. Thetis	2"	3.50
The need for quality flowers in abundance in late winter and spring prompted the making of this cross.	2½"	5.00
	3"	7.50
	4"	10.00
C. Monmoss x Lc. Altesse	3"	7.50
Winter and spring bloomer. Crossing these two parents should prove a happy combination, for both have many desirable characteristics. Medium to dark lavender and growth should be very good.	2"	3.50
	2½"	5.00
C. Nutley alba x Bc. Seafoam	2½"	7.50
We expect a very worthwhile white with purple lip Brasso-Cattleya from this cross.	3"	10.00
C. Trianae x Blc. Montecito	2"	3.50
A winter bloomer of unusual flower quality. The Blc. Montecito used had light lavender sepals and petals with a dark crimson band running down the center of the petals.	2½"	4.50
	3"	6.50
Lc. Sagana x C. Enid	2"	3.50
A winter bloomer of vigor with good color we feel will be the result of this cross. The season is expected to be somewhat variable due to the C. Enid.	2½"	5.00
	3"	7.50
Lc. George Patterson (Lc. Altesse x C. Remy Cholet)	2½"	5.00
We feel this will shape up into another C. Remy Cholet hybrid of real merit. Color—medium to dark. Season—winter and spring.	3"	7.50
	3½"	10.00

Name, Parentage and Description	Size	Each
Lc. George Baldwin (Lc. Princess Margaret x C. Enid)	2½"	5.00
As could be expected of a Lc. Princess Margaret cross this one is definitely above average. The flowers are large and of good shape, substance and color. Fall season predominates.	3"	7.50
	5"	17.50
Lc. Ethel Merman (Lc. Jane Dane x Lc. Canhamiana alba)	2½"	5.00
Plants of this cross which have flowered in small pots have been very promising. White sepals and petals with solid purple lip. A spring bloomer of vigor.	3"	10.00
	3½"	12.50
	4"	15.00
Lc. Famagusta (Lc. Fame x Lc. Ivanhoe)	5"	22.50
Flowers of this variety are large, of good shape, substance and color. The season is fall to early winter. The growth is very good.	5½"	25.00
C. Diplomat (C. Hivernalis x C. Remy Cholet)	5"	12.50
Strong in growth and exceedingly free flowering. The sepals and petals are light rose lavender with a darker lip. A dependable winter bloomer.	5½"	17.50
Lc. Lily Anthony (C. Mossiae x C. Beatrice)	4½"	7.50
A free flowering spring lavender of compact growth.	5"	10.00
	5½"	15.00
	6"	20.00
C. Sir Pertinax (C. Sir Walter Scott x C. Mossiae)	5"	15.00
A very worthwhile and dependable winter bloomer. While the flowers are light they have good size and substance and are freely borne throughout the winter season.	5½"	20.00
	6"	25.00
C. Altadena (C. Hardyana x C. Intertexta)	5"	20.00
Exceeding strong growing variety producing flowers of dark rose lavender. Variable flowering season, late summer and fall predominating.	5½"	25.00
	6"	27.50
C. Jevan (C. Nebo x C. Gen. Pulteney)	5"	10.00
A compact grower and very vigorous. Flowers are of medium color and have good form and substance. Season is from October through March.	5½"	15.00
	6"	20.00
C. Trianae x C. Prospector	5"	12.50
A definite winter bloomer. The color is medium rose lavender while the shape and substance is very good.	5½"	15.00
	6"	20.00
	7"	25.00
C. Acolita (C. Trimos x C. Tityus)	5"	20.00
We have bloomed a number of these and the average has been very high. Flowers are of good size and substance and have crimson lips with a very generous amount of yellow in the throat. The season is January on.	5½"	25.00
	6"	30.00

Name, Parentage and Description	Size	Each
Lc. Callistoglossa (C. Gigas x L. Purpurata)	5"	15.00
A good grower. The flowers are large and very richly colored. Shows the influence of the Laelia parent strongly. Lc. Callistoglossa has been used in the making of some of our finest present day hybrids.	5½"	20.00
	6"	25.00
C. Iona (C. Intertexta x C. Sir W. Scott)	4"	5.00
A variable bloomer, primarily spring and summer. Medium rose lavender flowers.	6"	20.00
Lc. Virginia Ellen (Lc. Santa Claus x C. Prince Shimadzu)	4½"	20.00
We think very highly of this cross. The growth is good and the flowers are large and of excellent substance and color. It is a dependable spring bloomer.	5"	25.00
C. Furnes (C. Dupreana x C. Mossiae)	4½"	12.50
Compact, free flowering medium lavender. Winter and spring.	5"	15.00
	5½"	17.50
	6"	20.00
Lc. Edna Richter (Lc. Santa Claus x C. Trianae var. Grand Monarch)	4½"	12.50
Medium to dark flowers with splashed petals is characteristic of this cross. The season is late winter to spring.	5"	15.00
	5½"	17.50
	6"	25.00
C. Rodolph (C. Remy Cholet x C. Warneri, Ardenholme var.)	5"	20.00
A fine hybrid of great vigor. The flowers are warm rose lavender with a darker crimson lip. The season is summer and fall.	5½"	25.00
Bc. Veitchii (syn. Bc. Digbyano-Mossiae)	5½"	25.00
Our strain of this old favorite has very good color. The flowers are warm rose lavender and of good size. The season is quite variable though summer and fall predominate.	6"	30.00
	7"	35.00
C. Enid (C. Gigas x C. Mossiae)	4"	5.00
Season is variable. Some plants of C. Enid are in flower at all times of the year. Plants generally flower twice a year.	4½"	7.50
	5"	10.00
	5½"	12.50
	6"	17.50
Lc. Venetia (Lc. Valencia x C. Clotho)	6"	35.00
One of the most vigorous varieties we have. The flowers are large and of good color, shape and substance. We think highly of this cross.	7"	40.00
C. Fabianid (C. Enid x C. Fabia)	5"	15.00
July through early fall is the main season. Flowers are dark rose lavender with darker lip veined gold. Very fragrant.	5½"	17.50
	6"	22.50

Name, Parentage and Description	Size	Each
C. Mrs. F. Knollys (C. Hardyana x C. Mossiae var. Countess Grey F.C.C.)	5" 5½" 6"	15.00 20.00 30.00
A good grower and a free bloomer. The season is variable, though mainly winter. Sepals and petals are rich rose lavender with darker lip veined gold.		
Bc. Mars (Bc. Mrs. J. Leeman x C. Maggie Raphael alba)	4½" 5½" 6"	12.50 15.00 17.50
A clear yellow brassocattleya. The sepals and petals are light yellow while the large fringed lip is several shades darker. The season is winter and spring.		
Lc. Soulangé (Lc. Lustre x C. Dowiana)	5" 5½" 6"	20.00 25.00 30.00
Characteristically an Lc. Lustre hybrid. Color, shape and texture are very good. The flowering season is summer and fall.		
Lc. Maracay (Lc. Hilary x C. Tityus)	6"	25.00
Flowers are warm rose lavender with richer crimson lips. The growth is very good. Season — Fall.		
Lc. Santa Claus x C. Falco	4½" 5" 5½" 6"	10.00 12.50 17.50 20.00
Vigor and amazing production are the two outstanding characteristics of this commendable spring bloomer.		
Lc. Seaforth (C. Intertexta x Lc. Locarno)	4½" 5" 5½" 6"	17.50 20.00 22.50 25.00
A very free flowering Laeliocattleya and of fine shape. The season is variable, though fall and early winter predominate. Sepals and petals are deep lavender to rose with rich crimson lips.		
C. Trianae (Species)	4" 4½" 5" 5½" "	3.00 4.00 5.00 6.00 7.00
Worthwhile for an amateur collection. Season is primarily from January on into spring. Light lavender.		
Phalaenopsis Schilleriana (Species)		
Delicate pink flowers of from 1½ to 2 inches across. The fragrant flowers are freely borne in sprays. These plants are extremely ornamental even when they are not in flower, having dark green strap-like leaves that are banded and splashed with a lighter silvery green.		
Mature plants in 6" baskets. Leaves from 8-12 inches.		7.50, 10.00, 12.50
Phalaenopsis Piety (Gilles Gratiot x Sanderiana alba)	3" 4" 6" Basket	3.50 5.00 10.00
An extremely free-flowering white. Flowers are from 2-3 inches.		

	Size	Each
ANTHURIUM HYBRIDS	4"	3.50
	5"	6.00
	6"	9.00
	7"	11.00
	3 gal. can	12.50 up

We have an extensive collection of vigorous flowering size hybrid Anthurium plants to offer. The colors range from pale shell pink through deeper pinks to salmon, coral, orange and shades of red. Anthuriums can be grown very nicely in the greenhouse with orchids or regular pot plants or even as house plants. The blooms are extremely long lasting and are produced constantly throughout the year. The heart shaped leaves are very decorative also. All plants listed are flowering size or near flowering size.
